In computer science, artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. Computer science defines AI research as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving ...

Artificial intelligence - Wikipedia

AI for Good. AI for Good is a movement in which institutions are employing AI to tackle some of the world's greatest economic and social challenges. For example, the University of Southern California launched the Center for Artificial Intelligence in Society, with the goal of using AI to address socially relevant problems such as homelessness.

Applications of artificial intelligence - Wikipedia

About. Discipline is a publisher and contemporary art journal edited by Nicholas Croggon, David Homewood, and Helen Hughes. Alongside artist pages and interviews, it publishes research essays about contemporary Australian art, and histories and theories of contemporary art as a global industry or phenomenon.

Environmental Awareness - Naturalist Intelligence Environment is the area in which we live and share. The thin layer of air that surrounds our planet that supports life. Humans are the only kind of life that we know of that exists in our universe. If we did not have our environment we could not exist.
