

BEGINNING GROOVY AND GRAILS FROM NOVICE TO PROFESSIONAL

beginning groovy and grails pdf

Grails is an open source web application framework that uses the Apache Groovy programming language (which is in turn based on the Java platform). It is intended to be a high-productivity framework by following the "coding by convention" paradigm, providing a stand-alone development environment and hiding much of the configuration detail from the developer.

CakePHP is an open-source web framework. It follows the model–view–controller (MVC) approach and is written in PHP, modeled after the concepts of Ruby on Rails, and distributed under the MIT License.. CakePHP uses well-known software engineering concepts and software design patterns, such as convention over configuration, model–view–controller, active record, association data mapping ...

CakePHP - Wikipedia

Geb was born out of a desire to make browser automation (originally for web testing) easier and more productive. It aims to be a developer tool in that it allows and encourages the using of programming and language constructs instead of creating a restricted environment. It uses Groovy's dynamism to remove the noise and boiler plate code in order to focus on what's important — the ...
