In probability theory, the multi-armed bandit problem (sometimes called the K-or N-armed bandit problem) is a problem in which a fixed limited set of resources must be allocated between competing (alternative) choices in a way that maximizes their expected gain, when each choice's properties are only partially known at the time of allocation, and may become better understood as time passes or ...

Multi-armed bandit - Wikipedia

Strategy set. A player's strategy set defines what strategies are available for them to play.. A player has a finite strategy set if they have a number of discrete strategies available to them. For instance, a game of rock-paper-scissors comprises a single move by each player - and each player's move is made without knowledge of the other's, not as a response - so each player has the ...

Strategy (game theory) - Wikipedia

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Abstract Book for the 9th Annual Conference on Business: Accounting, Finance, Management & Marketing, 3-7 July 2011, Athens, Greece. TABLE OF CONTENTS (In Alphabetical Order by Author) Preface

Business: Accounting, Finance, Management & Marketing

COMPUTER NETWORKS & SECURITY. This track focuses on communication and security issues in networks. It will include heterogeneous networks, wireless networks, energy efficient networking, internet architecture and protocols, traffic analysis, content centric networks, trusted computing, online social networks, High-speed networks, Cloud Communication, smart grid communication and networking.
