Development-induced displacement and resettlement (DIDR) occurs when people are forced to leave their homes and/or land as a result of development. This subset of forced migration has been historically associated with the construction of dams for hydroelectric power and irrigation but is also the result of various development projects such as mining, agriculture, the creation of military ...

The Mining Act 1992 defines rehabilitation as the treatment or management of disturbed land or water for the purpose of establishing a safe and stable environment. In practice mining rehabilitation can cover a range of activities, such as demolition of infrastructure, remediation of contaminated land, establishing a final land form and re-vegetation.
