ADDENDUM - Lumiere Technology is emerging as a vital player for expertise and study of art history. Our process has just modified traditional methods of investigation used from years by experts and museums labs:: macro photography, infrared reflectography, spectro-colorimetry at a level of synthesis ever obtained, through such multispectral high definition Digitization in one operation.

### **Lumiere-Technology - RGB - GIS - Multispectral Digitization**

Transits of Venus directly between the Earth and the Sun's visible disc are rare astronomical events. The first such transit to be predicted and observed was the Transit of Venus, 1639, seen and recorded by English astronomers Jeremiah Horrocks and William Crabtree. The observation by Mikhail Lomonosov of the transit of 1761 provided the first evidence that Venus had an atmosphere, and the 19th ...

Exploration is the act of searching for the purpose of discovery of information or resources. Exploration occurs in all non-sessile animal species, including humans. In human history, its most dramatic rise was during the Age of Discovery when European explorers sailed and charted much of the rest of the world for a variety of reasons. Since then, major explorations after the Age of Discovery ...
