Overview. Business Process Model and Notation (BPMN) is a standard for business process modeling that provides a graphical notation for specifying business processes in a Business Process Diagram (BPD), based on a flowcharting technique very similar to activity diagrams from Unified Modeling Language (UML). The objective of BPMN is to support business process management, for both technical ...

In software engineering, a class diagram in the Unified Modeling Language (UML) is a type of static structure diagram that describes the structure of a system by showing the system's classes, their attributes, operations (or methods), and the relationships among objects.. The class diagram is the main building block of object-oriented modeling. It is used for general conceptual modeling of the ...

Persuasive Techniques in Advertising The persuasive strategies used by advertisers who want you to buy their product can be divided into three categories: pathos, logos, and ethos. Pathos: an appeal to emotion. An advertisement using pathos will attempt to evoke an emotional response in the consumer.
