Patient participation, as it pertains to the formation of health policy, is a process that involves patients as stakeholders, advisors and shared decision makers. The practice of engaging patients in health policy originated from the consumer advocacy movement, which prioritized consumer safety, access to information and public participation in public health programs.

Overview. Previous research by The King’s Fund has shown that unhealthy behaviours cluster in the population. Around seven in ten adults do not follow guidelines on tobacco use, alcohol consumption, healthy diet or physical activity, yet most behaviour change services address these behaviours separately, not reflecting the reality of people’s lives.

Diffusion of innovations is a theory that seeks to explain how, why, and at what rate new ideas and technology spread. Everett Rogers, a professor of communication studies, popularized the theory in his book Diffusion of Innovations; the book was first published in 1962, and is now in its fifth edition (2003). Rogers argues that diffusion is the process by which an innovation is communicated ...
