Nonlinear diffusion with a bounded stationary level surface? arXiv:0902.1929v1 [math.AP] 11 Feb 2009 Rolando Magnanini[†] and Shigeru Sakaguchi[‡] June 14, 2013 Abstract We consider nonlinear diffusion of some substance in a container (not necessarily bounded) with bounded boundary of class C^2 .

We study variational systems for space curves, for which the Lagrangian or action principle has a Euclidean symmetry, using the Rotation Minimising frame, also known as the Normal, Parallel or Bishop frame.

In optics, the term soliton is used to refer to any optical field that does not change during propagation because of a delicate balance between nonlinear and linear effects in the medium. There are two main kinds of solitons: spatial solitons: the nonlinear effect can balance the diffraction. The electromagnetic field can change the refractive index of the medium while propagating, thus ...

Soliton (optics) - Wikipedia

The inverse scattering theory for many-body systems in quantum mechanics is an important and difficult issue not only in physics---atomic physics, molecular physics and nuclear physics---but also mathematics.

This manuscript focuses on the acoustical behaviors and surface morphology of seashell waste filler reinforced polyester (SFRP) coverings *Anadara granosa* Linn, *Perna viridis* Linn, and *Placuna placenta* Linn and applications in buildings. Their acoustical performances were observed using an impedance tube using a technique with two and four microphones based on ASTM E1050-98 and ASTM E2611-09.

Single-cell analysis of the breast tumor immune microenvironment, coupled with computational analysis, yields an immune map of breast cancer that points to continuous T cell activation and differentiation states.
