

OBSERVING LAND FROM SPACE SCIENCE CUSTOMERS AND TECHNOLOGY

observing land from space pdf

The Earth Observing System (EOS) is a program of NASA comprising a series of artificial satellite missions and scientific instruments in Earth orbit designed for long-term global observations of the land surface, biosphere, atmosphere, and oceans. The satellite component of the program was launched in 1997. The program is centerpiece of NASA's Earth Science Enterprise (ESE)

Earth Observing System - Wikipedia

Aqua, Latin for water, is a NASA Earth Science satellite mission named for the large amount of information that the mission is collecting about the Earth's water cycle, including evaporation from the oceans, water vapor in the atmosphere, clouds, precipitation, soil moisture, sea ice, land ice, and snow cover on the land and ice.

STS-3 was NASA's third Space Shuttle mission, and was the third mission for the Space Shuttle Columbia. It launched on 22 March 1982, and landed eight days later on 30 March. The mission involved extensive orbital endurance testing of the Columbia itself, as well as numerous scientific experiments. STS-3 was the first shuttle launch with an unpainted external tank, and the only mission to land ...
