HALDIA PETROCHEMICALS LIMITED

Petrochemicals (also known as petroleum distillates) are chemical products derived from petroleum. Some chemical compounds made from petroleum are also obtained from other fossil fuels, such as coal or natural gas, or renewable sources such as corn, palm fruit or sugar cane. The two most common petrochemical classes are olefins (including ethylene and propylene) and aromatics (including ...

Overview. The Petrochemicals Diversification Program is part of the Made-in-Alberta energy strategy that provides up to \$1.1 billion in royalty credits to encourage companies to build manufacturing facilities that turn ethane, methane and propane feedstocks into more valuable products, such as plastics, fabrics and fertilizers. Petrochemical manufacturing is the largest manufacturing sector ...

Withdrawal of approved methods employing CFC-113. Methods that employ CFC-113 as the extraction solvent and that were approved for testing of oil and grease in water at 40 CFR Part 136 are EPA Method 413.1 and Standard Methods No. 5520B. EPA withdrew these methods in the final rule published March 12, 2007. The only method approved for testing oil and grease in wastewater is EPA Method 1664A.
