The HTML5 specification does not specify which video and audio formats browsers should support. User agents are free to support any video formats they feel are appropriate, but content authors cannot assume that any video will be accessible by all complying user agents, since user agents have no minimal set of video and audio formats to support.

January 2008 HTML5 was published as a Working Draft by the W3C. Although its syntax closely resembles that of SGML, HTML5 has abandoned any attempt to be an SGML application and has explicitly defined its own "html" serialization, in addition to an alternative XML-based XHTML5 serialization. 2011 HTML5 – Last Call On 14 February 2011, the W3C extended the charter of its HTML Working Group ...

The practical values of this VB.NET image resizer control SDK lie in two aspects: image enlarging and image shrinking. In the daily life, if you want to send some image files or photos to someone via internet or if you want to publish an image or picture on your website, you would better reduce the original image size for a quicker web transmission.
