2nd National Conference - Dyscalculia Recent developments

In recent years, semiconductor photocatalytic process has shown a great potential as a low-cost, environmental friendly and sustainable treatment technology to align with the “zero” waste scheme in the water/wastewater industry. The ability of this advanced oxidation technology has been widely demonstrated to remove persistent organic compounds and microorganisms in water.

Recent developments in photocatalytic water treatment

Last updated: Mar 4, 2019. What’s New? Recent (unpublished) papers are available in reverse chronological order.. What have I done recently? My research since 1995 is organized by topic.. Some pieces are easier to read.. The work I’m currently presenting (in conferences and seminars) is collected together.. What have I ever done?

Andrew K Rose Recent Research - Berkeley-Haas

Role theory concerns one of the most important features of social life, characteristic behavior patterns or roles. It explains roles by presuming that persons are members of social positions and hold expectations for their own behaviors and those of other persons. Its vocabulary and concerns are popular among social scientists and practitioners, and role concepts have generated a lot of research.

Black men are less likely to visit a doctor and receive preventative services like diabetes screening than their non-black counterparts. A study summarized in the most recent issue of the NBER Bulletin on Aging and Health finds that black male patients who see black doctors elect to receive recommended preventative health screenings at a much higher rate than those who see a non-black doctor.
