In the midst of a major drought, California Governor Jerry Brown signed what is perhaps the most significant legislative water initiative in California in half a century: the Sustainable Groundwater Management Act of 2014 (SGMA) [Ley de Gestión Sustentable del Agua Subterránea]. The act consists of three legislative bills, Senate Bill SB 1168 (Pavley), Assembly Bill AB 1739 (Dickinson), and ...

Groundwater is an essential public and drinking water supply and its protection is a goal for global policies. Here, we investigated the presence and prevalence of antibiotic residues, antibiotic resistance genes (ARGs), mobile genetic elements (MGEs), and microbial contamination in groundwater environments at various distances from urban areas.

Water pollution is the contamination of water bodies, usually as a result of human activities. Water bodies include for example lakes, rivers, oceans, aquifers and groundwater. Water pollution results when contaminants are introduced into the natural

environment. For example, releasing inadequately treated wastewater into natural water bodies can lead to degradation of aquatic ecosystems.

Stormwater Practices is a term for Best Management Practices (BMPs) which are used to help ensure longevity and improve the health of Lake County's watersheds. BMPs can be implemented by homeowners, businesses, organizations and municipalities. BMPs can be as simple as using phosphorous-free fertilizer to a more complex activity like a project restoring a large section of degraded streambank.
