The socioeconomic impact of female education constitutes a significant area of research within international development. Increases in the amount of female education in regions tends to correlate with high levels of development. Some of the effects are related to economic development. Women's education increases the income of women and leads to growth in GDP.

Because we have to. It's simple: In the world's poorest communities, girls and women bear the brunt of poverty. Fighting poverty in those communities requires focusing on girls and women to achieve equality. When families struggle to grow enough food to eat, or earn enough money to send all their kids to school, it's the girls who are often the last to eat and first to be kept home from ...
