Even in an industry as dynamic as technology, innovation is hard. And it doesn't just happen automatically. Yet for established players to keep innovating at the speed of digital, they must bake innovation into everything they do—from application of the latest digital skills to renewed insight into what their customers need.

A work permit is the permission to take a job within a foreign country. It may also be a permit given to minors allowing them to work legally under child labor laws. Within an industry, a work permit may be required to execute certain functions within a factory outside normal operational tasks (such as maintenance tasks) — in some places they might be called Permit to Work

(PTW).

The world of work is in a state of flux, which is causing considerable anxiety—and with good reason. There is growing polarization of labor-market opportunities between high- and low-skill jobs, unemployment and underemployment especially among young people, stagnating incomes for a large proportion of households, and income inequality.

## IFTF: Future Work Skills 2020

A Proof-of-Work (PoW) system (or protocol, or function) is an economic measure to deter denial of service attacks and other service abuses such as spam on a network by requiring some work from the service requester, usually meaning processing time by a computer. The concept was invented by Cynthia Dwork and Moni Naor as presented in a 1993 journal article.
