1. Introduction. The World Wide Web (WWW, or simply Web) is an information space in which the items of interest, referred to as resources, are identified by global identifiers called Uniform Resource Identifiers (URI).. Examples such as the following travel scenario are used throughout this document to illustrate typical behavior of Web agents—people or software acting on this information space.

Executive Summary The Future of Jobs - World Economic Forum

Islamic architecture is the range of architectural styles of buildings associated with Islam.It encompasses both secular and religious styles from the early history of Islam to the present day. Early Islamic architecture was influenced by Roman, Byzantine, Persian, Mesopotamian and all other lands which the Muslims conquered in the 7th and 8th centuries.

In the early 19th century, Augustus Welby Northmore Pugin wrote *Contrasts* (1836) that, as the title suggested, contrasted the modern, industrial world, which he disparaged, with an idealized image of neo-medieval world. Gothic architecture, Pugin believed, was the only "true Christian form of architecture.". The 19th-century English art critic, John Ruskin, in his *Seven Lamps of Architecture* ...
